2.3.2 – Students mentoring system available in the institution? Give details. (maximum 500 words)

The University has a welldesigned mechanism for student support and mentoring. For this purpose, an Academic Monitoring Committee (AMC) has been constituted for every class, which addresses issues related to review of attendance, classtest results, discipline and other issues related to the students. Further, each faculty member is assigned 20 students to act as a mentor/counselor to monitor the performance of the students in studies, general discipline and their behaviour in the class. Counseling is provided to the students whose performance needs improvement. The counselors regularly inform the parents about their wards? welfare, attendance and academic performance. In addition, the Directorate of Student Affairs reviews and advises on organization and participation of students in co and extracurricular activities. The Directorate of Training Placement assists students by imparting placement training by organizing mock interviews and counseling sessions.The Directorate of Training Placements provides counseling in career opportunities for the aspirants. It also organizes training sessions and arranges for campus placements. All the hostel inmates are provided with regular mentoring by the faculty coordinators beyond class hours in addition to the wardens. Apart from classroom interaction, academic mentoring is provided by way of the following measures: Exclusive counseling hours are scheduled in the time table for the benefit of students. The counselors identify the academic needs of the students and organize additional classes. Tutorial hours are part of the time table which helps the students to have personal interaction with the teachers. The hostel faculty coordinators organize tutorial sessions in the hostels for the slow learners based on their need. The University conducts shortterm English proficiency courses for improving communication skills.

8.Future Plans of Actions for Next Academic Year

GITAM (Deemed to be University) will enrich education in all Under graduate, Graduate, Doctoral studies, enhancing curricula at both levels. In the faculties,

we will deliver education that equips each student with broad outlooks, academic sophistication, language proficiency, and fundamental knowledge in their field of specialization. We will pursue the highest global standards of research and endeavour to foster motivated and creative researchers capable of playing active roles internationally. We cultivate highlevel professionals. We will welcome talented researchers regardless of age, gender, or nationality, and create an environment that brings out the best in these researchers in both research and education. We will advance education and research that involves graduate schools, faculties, research institutes and centres' working in concert and tackling new fields of academic endeavour. For this purpose we will adopt decentralized establishment of new organizations within the university. We will enable organic collaboration across the Hyderabad, Bangalore and Visakhapatnam campuses. We will develop support structures across all areas of research and education at the university, and enhance not only research and teaching facilities, but also library systems and information technology infrastructure, welfare services, and other organizations and facilities that support research and education. GITAM University advances with its numerous programs that reinforce its position within the international scientific landscape, it is important to ensure that the GITAM community is well prepared to participate in the deployment of such programs. With this in mind the GITAM University is planning the creation of its own Institute of Advanced Studies. The primary aim of this Institute will be to promote an environment that encourages flexibility in the way careers are carried out within the University. This University will represent a privileged place for experimenting with new, unusual and innovative practices. Such practices that do not fit in with usual academic routines aim for excellence in research and originality in careers. Higher Education is already globalized and is sure to become even more so in the future. The future of the university will therefore be international both in terms of its ability to attract the best students and lecturers from around the world and also its international image and presence. We aim to use our best research forces to try and remedy some of society's biggest challenges. This will be achieved mainly by certain specializations which are firmly anchored within our economic and social environment for a fairly systematic multidisciplinary approach.
